Brilliant Design, Inside and Out

Etail/Disti Title

Corsair Obsidian Series 800D Full Tower PC Case

Etail Overview

The Corsair Obsidian Series 800D Full Tower PC case is designed from the ground up for builders. With their first entry into the market, Corsair has released an elegant and feature-laden chassis that true enthusiasts will covet with abandon.

Use the pre-cut cable routing holes (with included rubber grommets) to virtually guarantee an airflow-friendly clutter-free interior. Easily upgrade or swap out a hard drive with the four-drive hot-swap drive bay. Save precious time by using the CPU backplate cutout to upgrade a CPU heatsink. Get rid of those heat concerns you might have, because the 800D features three-zone cooling to keep those hot hard drives out of the path of fresh air to your power supply, CPU, and GPU. And if that isn't enough, the top comes pre-drilled for up to a triple 120mm radiator, ideal for watercooling.

The Corsair Obsidian 800D Full Tower Case is what you've been waiting for.
